THE KING OF CASINO GAMES

Albert Einstein once said, "You cannot beat a roulette table unless you steal money from it." While this may be true, it hasn't stopped people from trying to beat the odds for three centuries. Legend has it that Francois Blanc, who established the first casinos in the glamorous resort of Monte Carlo, allegedly bargained with the devil to learn the secrets of this "King of Casino Games." This devilish association is due to the fact that if you add up all the numbers on the wheel it totals 666—the Number of the Beast.
